Abstract: The name of the village comes from Breb, a water animal (the European beaver), which lived in Breboia, the river that crosses the village. To get to know the village as well as possible and to make the most of the beauty of the area, tourists can venture on a bicycle tour, if they want a more relaxing experience, they can call on a professional guide who can lead tourists on the trails in the area through which they can expand their love for nature and specific architecture, also depending on the season, they can choose wagon or sleigh rides. In order to have a complete experience, tourists will not just overlook the area dedicated to spending time with their loved ones, but in this sense the specially arranged places will be able to offer the opportunity for a picnic in nature but also to hold water competitions.

• Introduction

The village of Breb is a developed settlement in the Mara-Cosău area, with a hilly relief and natural resources with sulfurous springs, documented in the second half of the 14th century. The locality had the status of a climatic resort until 1918, when three springs were exploited by means of baths for the establishment and for internal cleaning.

Results and discussions

In order to preserve the charm and authenticity of the area we come with the proposal to open an agro-touristic guesthouse called Valea Castorilor where the specific architecture of the area is preserved through the 10 traditional Maramureșen cottages.

In addition to accommodation, the guesthouse will be able to offer various activities for all ages. To begin with, it offers the possibility to get to know the area better, so you can tour the village on the bicycles that are made available to tourists by the administrators of the guesthouse.

- The tourist guide provided by the administrators of the guesthouse can guide tourists on the Green Route that connects 7 traditional villages (The Green Route connects 7 protected areas and 7 villages: Creasta Cocosului Reserve, Crăiasca Forest, Lake Morărenilor, Hoteni Lake, Iezerul Mare Peat Bog, Cheile Tatarului; Poiana Brazilor Marshes. The 7 villages are representative for the culture of Maramureș: Ocna Șugatag, Budești, Breb, Hoteni, Hărnițești, Desești and Mara). This route can be done by bike, cart or on foot.

Conclusions: As a result of these proposed tourist facilities, we hope that the area will become better known as it has many unique natural resources as well as cultural and historical sights that are a source of inspiration and education for tourists. Through this we want to increase the number of tourists in the area and its development.
